1.	RSA encryption decryption using public and private key.		

PRACTICAL

Objective:

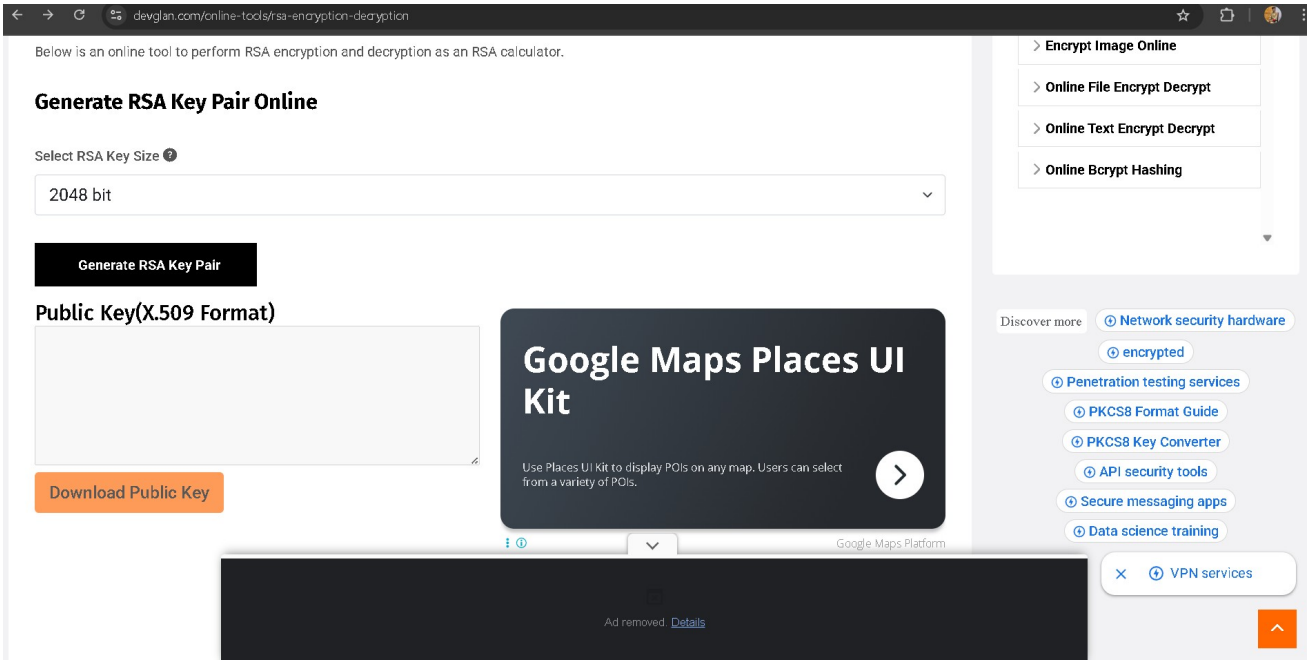
To demonstrate simple RSA key-pair generation, and encryption & decryption of a short message using the Any-Cript online RSA tool in a modern browser.

Requirements:

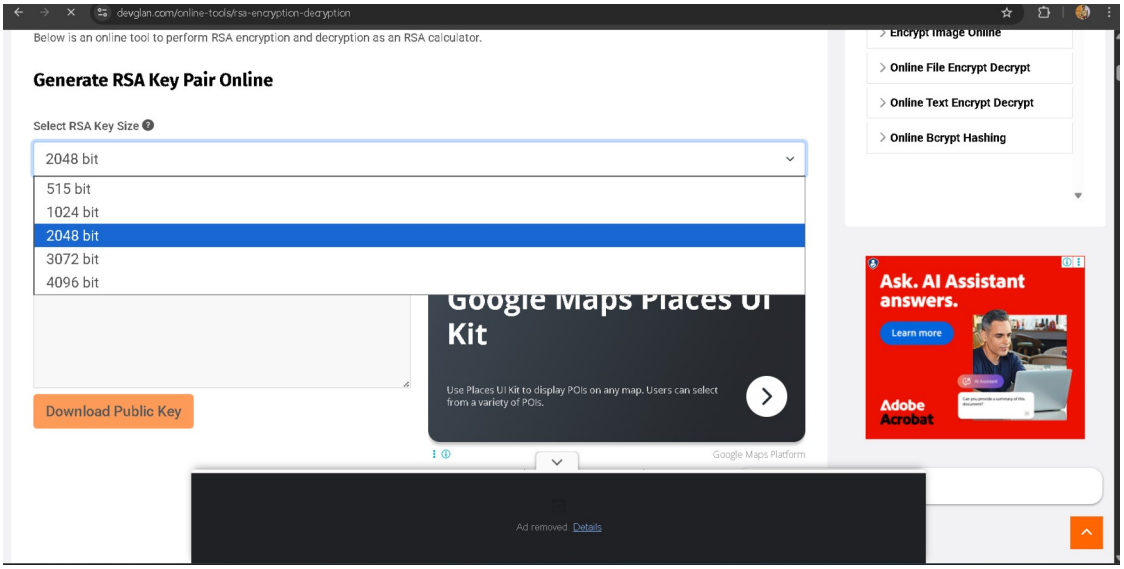
- Any modern web browser (Chrome, Firefox, Edge, Safari)
- Internet access to open the RSA Encryption & Decryption tool page.

Procedure:

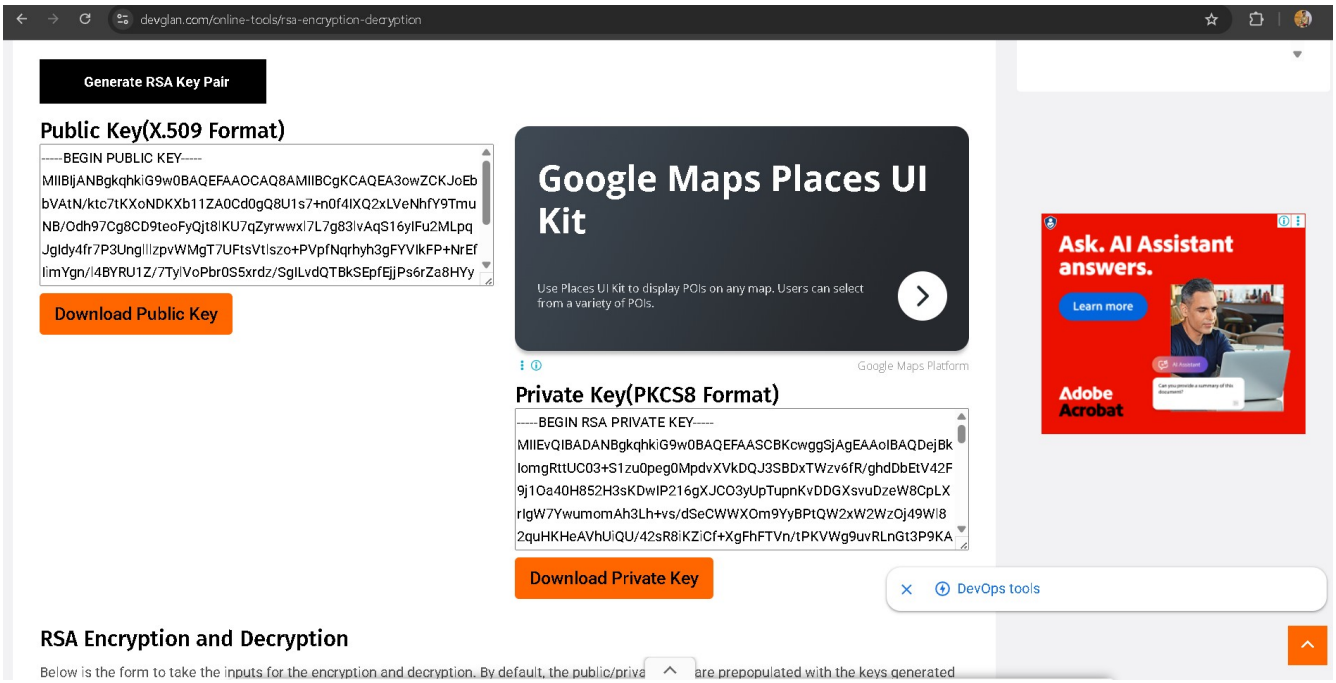
Step 1: Launch your browser and search RSA Encryption & Decryption.



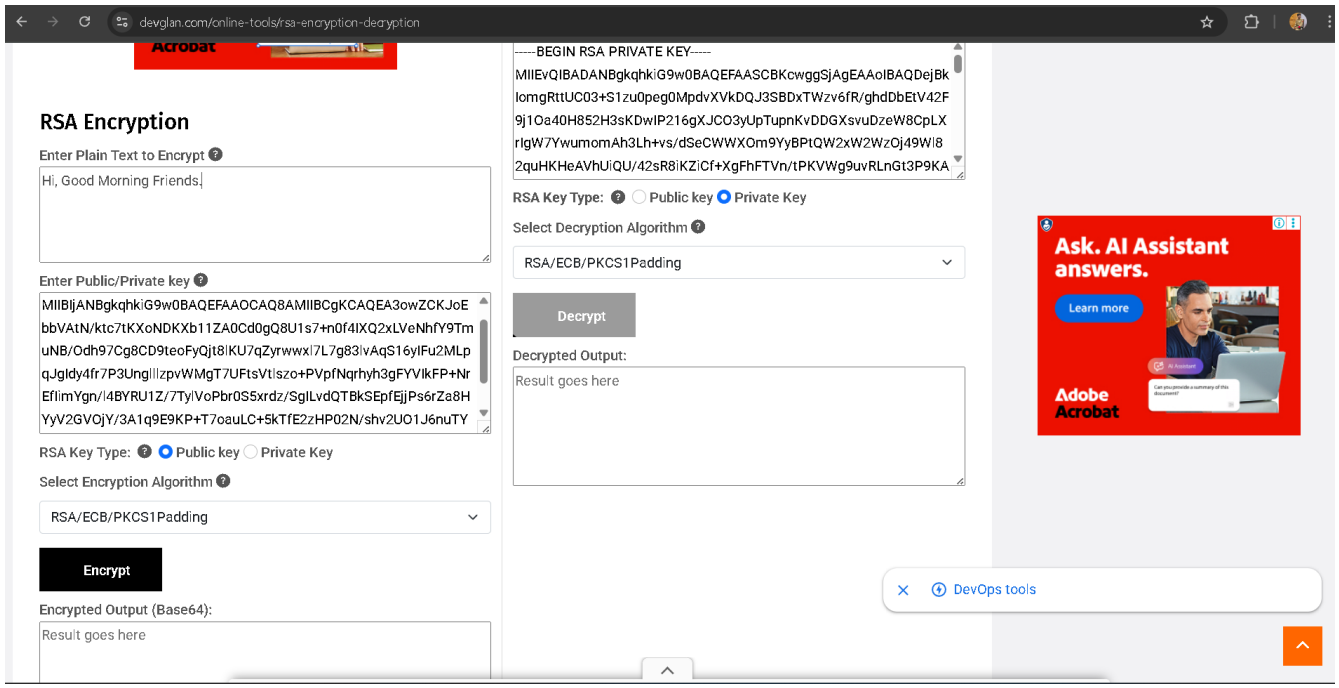
Step 2: Select RSA key Size.



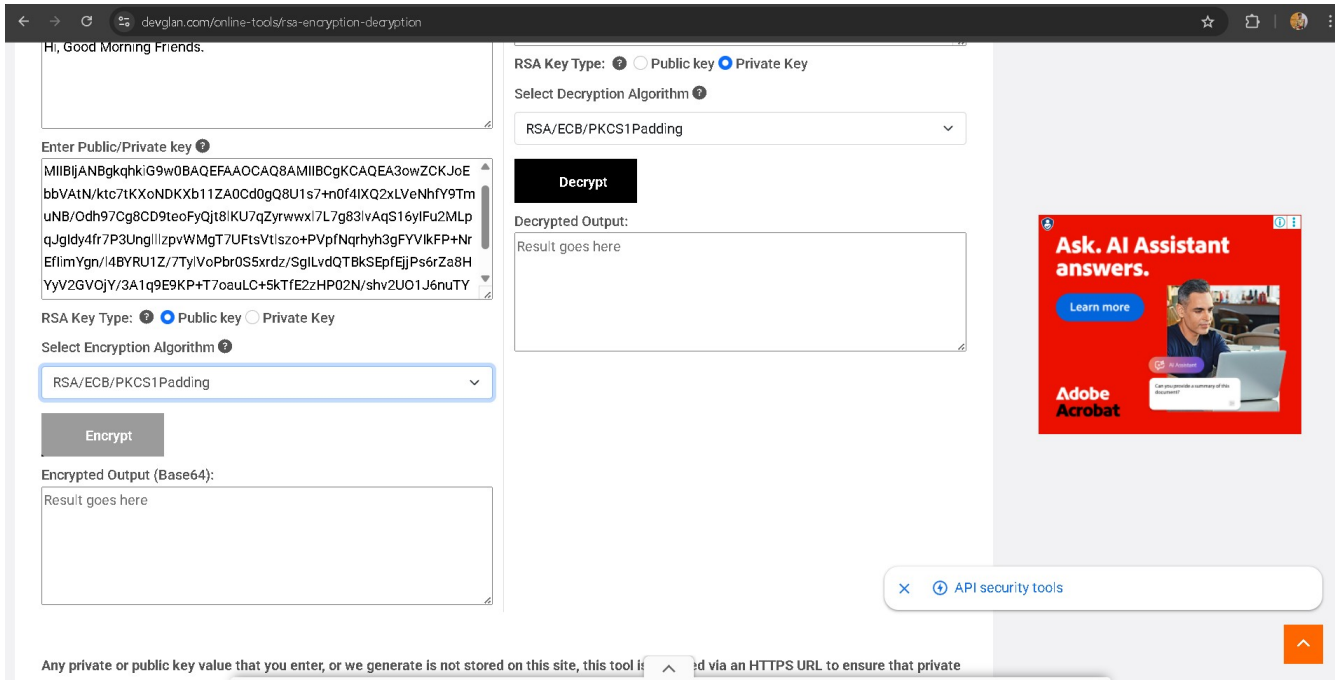
Step 3: Generate RSA Key Pair.



Step 4: Enter Plain Text to Encrypt.

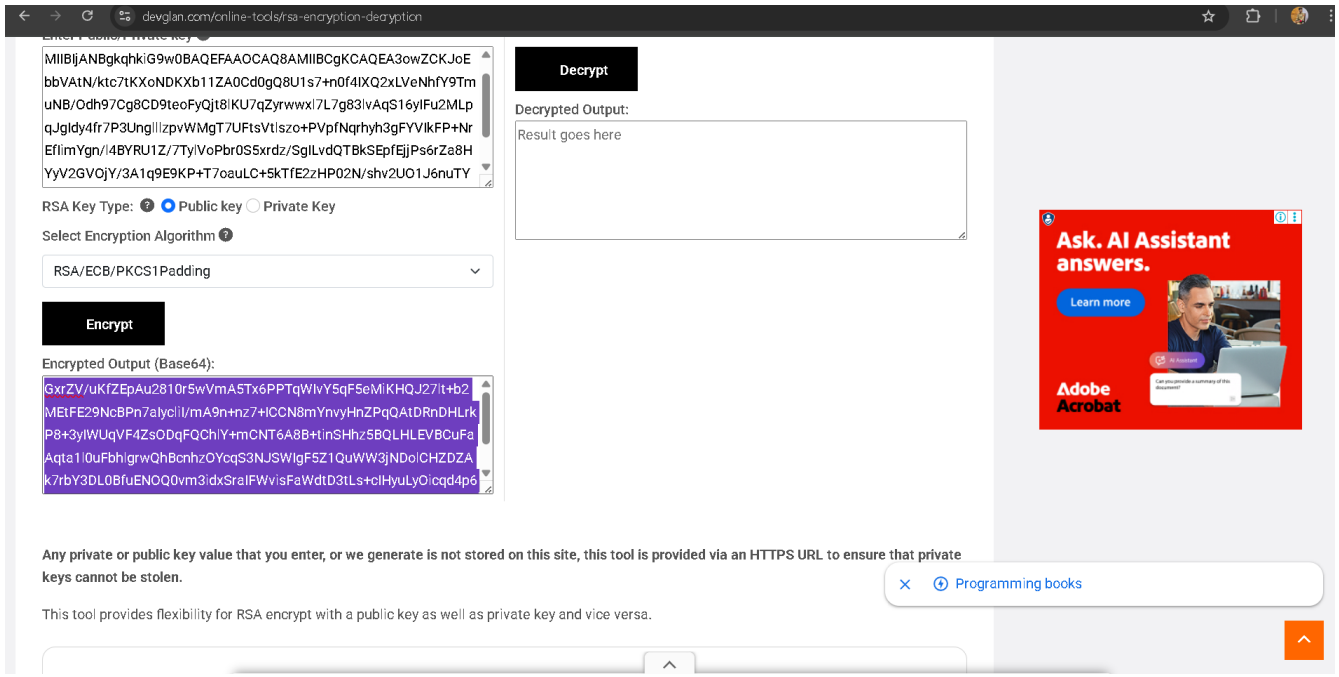


Step 5: Click on Encrypt.

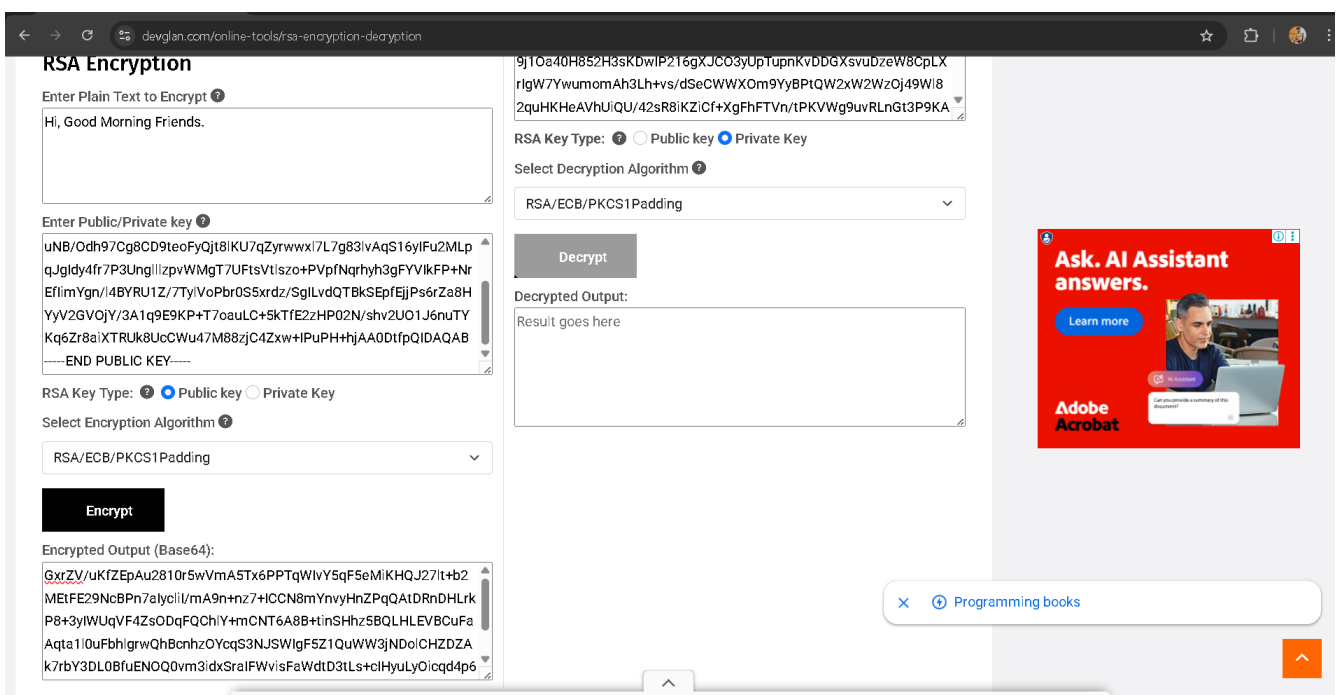


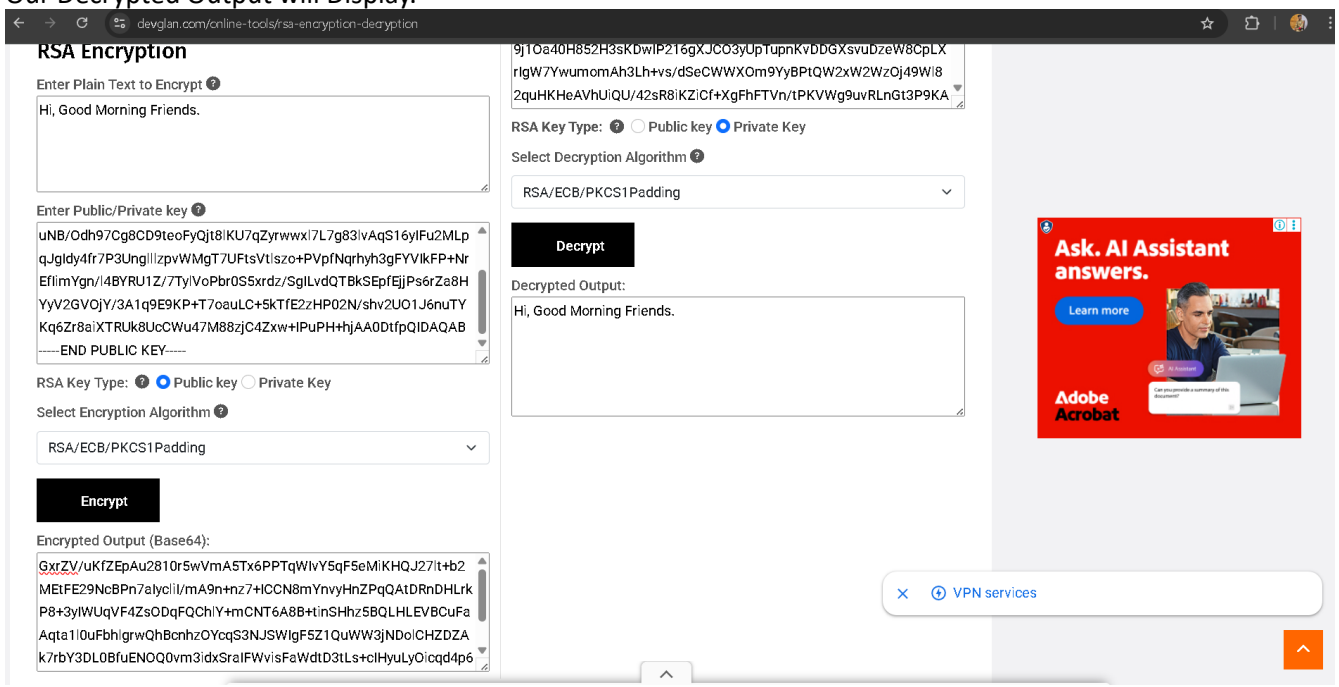
For Decryption

Step 6: Copy Encrypted Text and Paste it in the place of Encrypted Text.



Step 8: Click on Decrypt.





Our Decrypted Output will Display.
